

RFP for Security IT Services Provider
Questions & Clarifications #1
10/4/2021

1. *In lieu of a 30 hour per month block can a contractor propose a one day a week (8 hours) dedicated person to the PTCSC site?*

Yes; contractors can propose a dedicated day per week (8 hours) to the PTCSC's site in lieu of a 30-hour block of hours per month. If proposing a dedicated one day a week approach, the contractor should include what services the dedicated person can provide (i.e., programming of Genetec, camera maintenance, troubleshooting of Genetec PACS and/or VMS and/or components of those systems, etc.).

2. *How many badge readers are in the PTCSC's access control system?*

The PTCSC currently has 31 badge (card) readers plus 2 fixed TWIC readers and 2 portable TWIC readers as part of the PTCSC's access control system. Of the 31 badge readers, 10 are located within Oxbow's facility.
